PROJECTS

Statistics Retriever Dashboard/App | Power BI, Power Apps, Data ETL, Visualization 25 June 2024

I designed an Information Retriever Dashboard using Power BI. This dashboard provides insights and visualizations by connecting to the data sets provided by the firm. Additionally, I integrated it seamlessly with Power Apps, allowing users to access information directly within their applications. This demonstrates my proficiency in Data Visualization, Data (Extraction ,Transformation ,Loading), Business Intelligence, and Cross-Platform Integration.

Student Dashboard | Javascript, HTML, CSS 28th November 2023

I developed a responsive and dynamic Student Dashboard using HTML, CSS, and JavaScript. The dashboard includes features such as managing and viewing student data, including courses, exam results and schedules, profiles, assignments, professor details, attendance tracking, and timetable. It showcases my ability to create user-friendly interfaces.
